ABSTRACT

The goal of this project is to create a collection of six or more garments inspired by Versace's spring summer 2018 ready-to-wear collection. Because of the costumes and patterns that were used, that runway was one of the most popular. As a memorial to her late brother Gianni Versace, she gathered designs from the archives' history. The prints featured Vogue, Warhol, My Friend Elton, Icons, Baroque, Animalia, Native Americans, Tresor de la Mer, Metal Mesh, and Butterflies. When we think of animalia, the first thing that springs to mind is animal prints; are these prints created by harming animals? There was once, but roughly 70-75 percent of people stopped rationalising animals and instead transferred or favoured veganism**.**

Keywords:
Romanticism, Isonomy, Vegan prints, History of archives.

INTRODUCTION

It is not easy to get inspired by designs , elements or by things. But getting inspired by people is a something that always makes something special. *Donatella Versace* is a famous designer and the co-founder of *Versace.* Their archives collection of 2018 spring was wonderfully portrayed by *Donatella* to her brother *Gianni*. The designs that are collected from the history of archives to show as a tribute to her late brother ***Gianni Versace***. Vogue, Warhol, My Friend Elton, Icons, Baroque, Animalia, Native Americans, Tresor de la Mer, Metal Mesh, and Butterflies were the prints that are included. Romanticism was most popular in 18th century , 1800-1850 to be exact that period was called “romantic period”. They used to wear similar clothes back then like long knee skirt , trousers and sleeves with frill. So, to stir things properly the concept of romanticism has taken place for both men and women to show equality like the early period. Also, an animal neglect awareness by bringing vegan prints in reactionary is the idea. The best part about making this as a runway may be a good influence to the upcoming future trends or to the generation may be even better some of the best designers could notice that will create a more ways to the industry to show that feminism can also be indicate in fashion. The researches that are done for the review has been illustrated below

OBJECTIVES

The main objective of the study is to identify the challenges in the implementation of the newly adopted fashion industry. To bring isonomy, veganism/ vegan prints and to bring back the art of romanticism in practionary.

METHODOLOGY

This study was conducted using qualitative design. Case study was employed to understand the people minds and their point of perspective for isonomy in fashion and in the world. Vegan prints are not in practionary in the industry instead of people are using harmful chemicals to print their designs.

RESULTS AND DISCUSSION

Design a collection using the concept of Romanticism inspired by Baroque, Animalia in Versace spring 2018 collection(a collection made to Gianni Versace in which all sorts of archives were found) with the help of vegan prints. With the help of vegan prints / natural dyes people will be prominent to use them in spite of harmful chemical dyes. Using the concept of Romanticism equality can be found. Elegant runway and etiquette collection can be made by using the most popular prints like animalia, baroque and Warhol.

a) **Trend survey:**

The trend survey has been done before the board works that has to be made for future references, to get a clear idea of the board works and people point of view and approvation to this contribution to the project.

b) Board works:

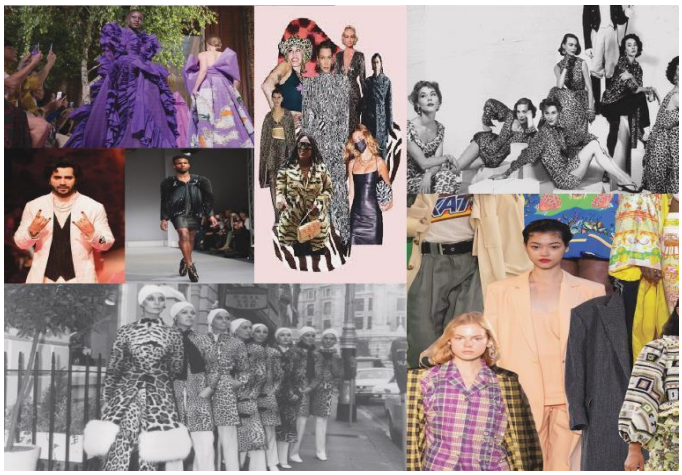
Inspiration borad:

The Inspiration board is the collection of Images which helps us with the start of any design project. The above-mentioned figure will be the inspiration for our project work. Since our work is based on the concept of romanticism, the main source of inspiration was the early period Victorian gowns and ball gowns. Also, this is a project inspired by Versace's collection so the images of that particular 2018 ready-to-wear garments were included. We all know harry styles shows his feminism in a way that he is so much popular than other feminist in the industry. He once wore a gown for the vogue magazine and it made out on the front page, he also did wear a dress to *meet gala.*

Trend interpretation board:



Mood Board:

A Mood board is a pictorial direction for any design project. This board consist of a series of images of inspiration, color palette, fabrics etc. The below figure is the mood board for our project. Our project is to design a collection of garments by using the concept of romanticism inspired by assorted elements in Versace spring 2018 ready-to-wear collection. The moods are based on feminity , 1800's , art of romanticism , dances, ball gowns and the elements like ruffles, hoop skirt, laces, puff slees, juliet sleeves and etc.

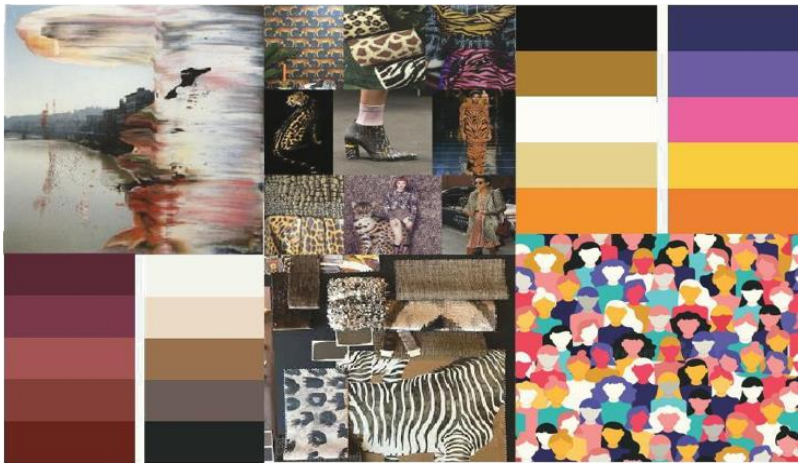
Color Board:



A color Board is a briefed definition of what are colors that are going to be represent on the outcome with the help of inspiration that has been selected. Since the project is all about romanticism the colors of the art can be used. Animalia is one of the important elements in this project so the prints of the animals which is ‘n’ number of colors, that also can be used.

ACKNOWLEDGEMENT

We thank the staff and our colleagues and our team members for the contibution to this project and the product that has been developed and the photoshoot and portfolio that has been done . we are thanking Mrs. G Dhanapriya for the guidance and our college to the oppurtunity Above all, to God.

CONCLUSION

Developing a collection of garments inspired by versace (from history of archives) is new expirience and to bring isonomy between people that it would be the first step of process. The process of vegan prints from removing the harmful chemical dyes to converting into natural dyes is a level up performance that we have done. To bring vegan prints into practionary is necessary for our society and for the fashion world, though its rare in market but we can find easily if tried. We have done our work from initial sketches, to survey and creating boards such as inspiration board, mood board and Trend Board for our design, continued with the processing of printing and the construction of the garments.
