MONISHA K²^{1,2}Fashion technology, Bannari Amman Institute of Technology, Sathyamangalam**ABSTARCT:**

Sammezzano ,or the castle of sammezzano, is an Italian palazzo in tucany featuring Moorish revival architectural style. The origin *palazzo* was erected in about 1605 by the Spanish nobleman Ximenes of Aragon. In the 19th century, Ferdinand panciatiichi Ximemes inherited the property and, between 1853 and 1889, remodeled it into one of the largest examples of Moorish Revival architecture. Umberto I, king of Italy, visited Ximenes at Sammezzano in 1878. ^[1]

The *palazzo* served as a luxury hotel in the post World War II era; then was vacated and closed. A committee called FPXA 1813–2013, abbreviation for Ferdinand Panciatiichi Ximenes d’Aragon, was organized in 2012 to attempt to restore and preserve the *palazzo*, which has 365 rooms, each with unique, Moorish decoration.

Final sketches are used to analyze the required fabric type, GSM, Finishing, colors, and quality during the fabric sourcing process. According to the finalized design, custom crafted patterns with antique values and considerable historical significance are embroidered in cloth. Patterns must be drawn with ease and seam allowance after measurements have been taken. In order to achieve seam strength of 30 IBS in woven textiles, place patterns on fabric, cut them out, then sew using SNLS with 8 to 10 SPI and a 4-thread over lock to protect the raw edges from thread raveling. After sewing is complete, a fit check must be performed, and adjustments are made based on the results. The project's intriguing last phase is about to begin. In order to capture and reach the target audience and market through the available means, such as magazines, journals, and social media, the model is photographed with a complete studio setup, makeup, and hairdo in high fashion mode.

CONCLUSION:

In a nutshell, this project is to develop a women's party wear collection in the theme cocktail party. Hence we have followed the design process and constructed women's party wear collection taking all specifications into account.

ACKNOWLEDGMENT

We wish to express our sincere thanks to Faculty guides Mrs. Mekala N and Mrs. Saranya D V for their constructive ideas, encouragements, excellent guidance and much needed technical support extended to complete our project work.
